

# Mark Scheme (Results)

Summer 2018

Pearson Edexcel International Advanced Level In Chemistry (WCH06)
Chemistry Laboratory Skills II

#### **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

#### Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <a href="https://www.pearson.com/uk">www.pearson.com/uk</a>

#### **General Marking Guidance**

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

| Question<br>Number | Acceptable Answers   | Reject   | Mark |
|--------------------|--|--|------|
| 1(a)(i)            | $Fe^{3+}/[Fe(H_2O)_6]^{3+}$ ALLOW                                  | Cr <sub>2</sub> O <sub>7</sub> <sup>2-</sup><br>Mn <sup>2+</sup> | 1    |
|                    | Fe <sup>+3</sup> IGNORE  |  |      |
|                    | State symbols, even if incorrect Incorrect number of water ligands |  |      |

| Question<br>Number | Acceptable Answers   | Reject               | Mark |
|--------------------|--|----------------------|------|
| 1(a)(ii)           | Fe(OH) <sub>3</sub> OR Fe(OH) <sub>3</sub> (H <sub>2</sub> O) <sub>3</sub> ALLOW TE on incorrect cation from (a)(i) Ligands in any order Incorrect number of water ligands | Fe(OH)₃ <sup>+</sup> | 1    |

| Question<br>Number | Acceptable Answers                       | Reject      | Mark |
|--------------------|--|-------------|------|
| 1(a)(iii)          | Iodine/ I <sub>2</sub> /I <sub>3</sub> - | I, FeI₃, I⁻ | 1    |

| Question<br>Number | Acceptable Answers   | Reject | Mark |
|--------------------|--|--------|------|
| 1(a)(iv)           | Silver nitrate (solution) / AgNO₃((aq)) ALLOW Ag⁺((aq)) IGNORE Subsequent tests e.g. addition of ammonia |        | 1    |

| Question<br>Number | Acceptable Answers  | Reject         | Mark |
|--------------------|---|----------------|------|
| 1(a)(v)            | Effervescence / bubbles (of colourless gas)/ fizzing  | Coloured gases | 1    |
|                    | IGNORE Gas is evolved Carbon dioxide forms Gas turns limewater cloudy Solid disappears Formation of precipitate | Other gases    |      |

| Question<br>Number | Acceptable Answers   |     | Reject  | Mark |
|--------------------|--|-----|---|------|
| 1(b)(i)            | Mark the three parts of this ite independently.  | em  |   | 3    |
|                    | Observation:<br>(pale /dark) green   | (1) | Blue-green  |      |
|                    | ALLOW for M2 and M3<br>Ligands in any order<br>Incorrect number of water ligands   | 5   |   |      |
|                    | Inference:<br>(precipitate)<br>Fe(OH) <sub>2</sub> / Fe(OH) <sub>2</sub> (H <sub>2</sub> O) <sub>4</sub>   | (1) | Fe(OH) <sub>2</sub> (NH <sub>3</sub> ) <sub>4</sub> |      |
|                    | (Cation) $Fe^{2+}/[Fe(H_2O)_6]^{2+}$   | (1) |   |      |
|                    | Allow TE <b>only</b> on Cr <sup>6+</sup> in (a)(i) an Cr <sup>3+</sup> in (b)(i) in which case all thremarks may be awarded: green / blue-green (1) Cr(OH) <sub>3</sub> (1) Cr <sup>3+</sup> (1) |     |   |      |

| Question<br>Number | Acceptable Answers   | Reject | Mark |
|--------------------|--|--------|------|
| 1(b)(ii)           | Mark independently   | FeO    | 1    |
|                    | Fe(OH)₃<br>OR  |        |      |
|                    | Fe(OH) <sub>3</sub> (H <sub>2</sub> O) <sub>3</sub> ALLOW Fe <sub>2</sub> O <sub>3</sub> |        |      |

| Question<br>Number | Acceptable Answers  | Reject | Mark |
|--------------------|---|--------|------|
| 1(c)               | <b>2Fe</b> <sup>3+</sup> + SO <sub>2</sub> +2H <sub>2</sub> O → 2 <b>Fe</b> <sup>2+</sup> + SO <sub>4</sub> <sup>2-</sup> + <b>4</b> H <sup>+</sup> |        | 1    |
|                    | OR  |        |      |
|                    | Use of hydrated ions ( e.g. $2[Fe(H_2O)_6]^{3+}$ and $2[Fe(H_2O)_6]^{2+}$ ) in equation   |        |      |
|                    | IGNORE  |        |      |
|                    | State symbols even if incorrect.  |        |      |

(Total for Question 1 = 10 marks)

| Question<br>Number | Acceptable Answers   | Reject         | Mark |
|--------------------|--|----------------|------|
| 2(a)               | Sodium hydrogencarbonate / NaHCO <sub>3</sub> (solution)  ALLOW KHCO <sub>3</sub> Sodium bicarbonate Sodium carbonate/ Na <sub>2</sub> CO <sub>3</sub> Potassium carbonate/ K <sub>2</sub> CO <sub>3</sub> IGNORE ice cold water | Strong alkalis | 1    |
|                    | ice cold water   |                |      |
